### **Call for Paper**

### **“2017 The Second International Roll Forming Technology Conference”**

#### **To all members and units:**

With the economy development of these years, the roll forming product output has been increasing rapidly in China. In the roll forming product industry, it will become more diversified, and the high-strength steel, weathering steel are becoming widely used in some fields such as automobile and bridge; in the technology industry, the intelligent and advanced technology will be put on an important position in current China, Moreover, China's various economic and political policies has brought a lot of favorable stimulus for the development of roll forming industry. And the advantages of roll forming products are increasingly recognized by the user industry, its product applications is becoming more and more widely. In 2015, the first international roll forming technology conference organized by CCRFI was hold in Suzhou in China, Which attracts more than 500 audience, achieved good results and great impact. Based on this, CCRFI will hold the second international roll forming technology conference on September 10-12, 2017 in Guangzhou Canton Fair Pazhou Exhibiton Hall. This conference is calling for paper on the topics of the raw material, molding, design, stamping, welding,

heat treatment, cutting, packaging, application, detection, secondary processing, etc..

In order to improve the pertinence and effectiveness of the conference in exchange and discussion and enhance the quality of research, we are calling for papers on the following topics, and the outstanding papers will be possible selected for the conference presentation. The main content is as follows:

1. Raw materials and coating process;
2. New materials suitable for roll forming;
3. The cutting, welding, heat treatment and punching technologies of metal materials;
4. Advanced roll forming design and manufacture technologies;
5. Cold-formed products and technologies applied in construction, automotive, municipal and mechanical fields;
6. Manufacturing process of cold bending tooling industry;
7. The detection and secondary processing technologies and techniques of cold-formed products.

**Conference Organizer:**

Chinese Confederation of Roll Forming Industry

University of Wollongong Australia

Hong Kong Polytechnic University

National Taiwan University of Science and Technology

University of Science and Technology Beijing

Northeastern University

Xi'an University of Architecture and Technology

North China University of Technology

**Supported by:**

China Iron and Steel Association

China Steel Construction Society

Hong Kong Constructional Metal Structures Association

Macau Society of Metal Structures  
Beijing Mechanical Engineering Society  
China Academy of Building Research  
China Iron & Steel Research Institute Group  
Tongji University etc

We welcome paper submission from enterprises, scientific research, design, institutions, and equipment manufacturing units. Please submit the paper to CCRFI email before June 1, 2017 and fulfill the authors or speakers brief background and contact. The Conference will choose the outstanding papers presented at the conference.

Contact: Elane, Shearly, Guo Xing  
Chinese Confederation of Roll Forming Industry (CCRFI)  
Tel: +86 10 63813263 Fax: +86 10 63813263  
Email: chinacri2011@126.com

**Appendix: 1. Authors Receipt Form**  
**2. Paper Format Requirement**

Chinese Confederation of Roll Forming Industry (CCRFI)

**Appendix 1**

**“2017 The Second International Roll Forming Technology  
Conference” Authors Receipt Form**

**Serial NO.:**

Name		Sex		Thesis	
Unit Name and Address				Postcode	
Position/Title				Fax	
Tel			Cellphone		
E-mail					
Author's Brief Background					

**Notice:**

**1. Please e-mail this form to Chinese Confederation of Roll Forming Industry (CCRFI) before June 1, 2017;**

**2. Email: chinacri2011@126.com Fax: +86 10 63813263;**

## Appendix 2

### **“2017 The Second International Roll Forming Technology Conference” Paper Format Requirement**

1. Uniformed Format: Word; Paper type: A4;
2. Indicate “ 2017 The Second International Rolling Forming Technology Conference” in the 1st page top left corner of the 5<sup>th</sup> Song font;
3. Before the body, indicate author’s name by the 4th song font in the first line, the next line indicates author’s belonging unit, city and postcode by the 5th song font in the parentheses. In addition, both lines need to be centered;
4. Before the body, indicate the thesis, author’s name and belonging unit in English and also the English summary by the 5th Time New Roman font;
5. Summary should be within 300 words;
6. The subject needs to be in the 2nd Blackbody font and centered, and also there are two lines space between the title and body;
7. The body needs to be in the 5th song font, 39 words each line and 39 lines each page (not include the page number); it reads in single line layout;
8. Subtitle (including the preface and conclusion) needs to be in the 4th song font;
9. Third and fourth title can also use Arabic number, and one word space following the heading; no point after number (Example: 2.3.3);
10. The third title uses small 4th black font, left-aligned per line;
11. The fourth title uses 5th Kai font as a line alone, before two words space;
12. Page number uses 5th song font, and points in both sides of number;
13. One line space between tables / charts and the body; heading uses 5th Black font and places in the center; and table/chart uses 6th Song font; tables and charts must locate close to expressing body paragraphs;
14. Figure caption uses 5th Song font and center right under the figure; figure’s body is with 6th Song font;
15. References are listed according to specifications with 5th font and marked accordingly in the body;
16. Author’s background: please introduce author’s background within 100 words in the Receipt Form.
